## The more you know...

Recyclable materials (bottles, cans, paper, cardboard, cartons, and other containers) should be placed loosely into a curbside recycling bin or local convenience center drop-off recycling container. If you must use a plastic bag to carry recyclables to the drop-off recycling facility - open the bag, dump the contents into the bin, and dispose of your plastic bag in the trash.

Plastic bags:

- ◆ Damage equipment at the recycling sorting facility
- ◆ Prevent materials from being properly sorted
- ◆ Add disposal costs
