Project: Huguenot Hills Public Sewer and Water Service Project

RE: Notification of Project Commencement

Dear Property Owner:

We are pleased to announce that the County has retained Timmons Group, Inc. to complete engineering and design services for the public sewer extensions and water system upgrades for the Huguenot Hills neighborhood. Timmons Group is currently working on the Preliminary Engineering Report (PER). In order to gather geotechnical information for the PER, field staff and soil testing equipment will need to access parts of the neighborhood over the next several weeks. Please know that the soil testing will be minimally invasive and that the areas planned for testing will be primarily confined to existing rights-of-way where traffic flow will be maintained. Additionally, a soil boring location map is attached to this letter for reference.

Once the PER is complete, we will schedule a community meeting to present the findings from the PER, collect community feedback and any concerns from residents, and discuss the project plans moving forward. In the meantime, feel free to send me any questions you may have at mlongshore@goochlandva.us or contact our office at (804) 556-5835.

Very respectfully,

Matt Longshore, PE
Director of Public Utilities
mlongshore@goochlandva.us

Cc: Jo Ann Hunter, Deputy County Administrator
Ken Peterson, District 5 Supervisor
